Workplace Alliance Pty Ltd Core values are about: Community, Social Procurement, Circular Economy, Inclusiveness, Embracing Indigenous Culture & Training. We always strive to: "Leave it better than we found it"

With 2 Workshops in the Greater Geelong Area & 1 in Ballarat we are perfectly positioned & involved in Servicing the needs of our clients in Victoria's South East.

Add to this, offices in both Kensington & Thomastown our Capability covers all of Greater Melbourne & beyond. Our North Geelong Premises is complete with integrated Work shop & Training Facilities. Our training is tailored to assist both young & old alike acquire the necessary skills required in gaining secure employment. We are working with Indigenous groups providing nationally accredited courses in hand & power tools. Our training centre is purpose built to provide the SEEKER group access to train Indigenous kids & provide both historical & contemporary learnings.

Our strengths are prevention and innovation. Made up from our, Mechanical Projects Division, Fabrication Division, Factory & Plant Relocation Division, Design Engineering Division, Facilities Maintenance Division & our Training & Inclusiveness Division rounds WPA out as a Full Service Provider & Employer of Choice.

Workplace Alliance's engineers are also trained to think outside the square in delivering repair and maintenance solutions, as well as considering improvements to internal processes relating to production of product to maximize potential energy, plant and monetary efficiencies.

Project Management is also a key service provided by Workplace Alliance. We have experience in a range of industries including cement, technology, textiles, medical, science, food and pharmaceutical, which gives us the knowledge to implement major projects relating to plant maintenance, installation, repair and refurbishment. Our technical expertise is complemented by our Contract Hire capabilities, which include an extensive database of experienced and highly skilled teams, who are mobilised into action by our own 24-hour call centre.

CORE COMPETENCIES

Asset Maintenance and Execution - Workplace Alliance's maintenance engineers have experience working on a diverse range of plant equipment and have the experience to design and fabricate equipment modifications that reduce failure intervals. We also value the experience of your team and will work cooperatively to use their knowledge of your plant and systems in formulating the best result for your asset maintenance needs, while also considering innovative solutions that will increase cost effectiveness and reliability for your organisation.

Emergency Breakdown Response – our own 24-hour call centre allows us to formulate skilled and experienced teams of proven individuals at short notice.

Project Management – our experienced project managers oversee the upgrade, refurbishment and installation of plant and equipment.

Engineering Workshop – we have teams that can fabricate, machine and weld parts, as well as produce innovative equipment solutions as identified by our engineers.

Six Sigma Reviews – our fully trained experts use the Six Sigma Review process to assist clients in gaining efficiencies via data and process analysis of systems and equipment.

Factory Relocations - our team have relocated several major clients including Carbon Revolution, Oberon High School, Godfrey Hirst, to name a few, with individual machine moves our specialty.

Contract Maintenance - Workplace Alliance has its own 24-hour call centre experienced in sourcing customized team for specific projects,
